

October 7, 2009

The Honorable Harry Reid
Majority Leader
United States Senate
S-221 Capitol Building
Washington, DC 20510

Dear Majority Leader,

As America's leading construction, engineering, conservation, labor, municipal, and manufacturing organizations, we strongly support the bipartisan Water Infrastructure Financing Act – S. 1005 and urge the Senate to take up and pass this critical infrastructure legislation this fall. The Water Infrastructure Financing Act is the product of years of work by the bipartisan leadership of the Environment and Public Works Committee and this legislation enjoys broad bipartisan support.

America is facing staggering shortfalls in water infrastructure investment and the highest unemployment rates in over two decades. The Environmental Protection Agency, the Government Accountability Office, and the Water Infrastructure Network have all projected shortfalls in water infrastructure funding approaching \$500 billion over the next 20 years, with the annual shortfall estimated at approximately \$23 billion. The Water Infrastructure Financing Act is a timely investment in our nation's critical water infrastructure that will generate approximately 1.1 million construction, manufacturing, and engineering jobs over the next five years.

The Water Infrastructure Financing Act will provide critical water infrastructure funding to communities of every size in every state. In fact, every state will receive significantly more water infrastructure funding through this legislation than is provided today. Significant funding will also be available to assist small and disadvantaged communities and support green infrastructure projects. Water quality in our lakes, streams and estuaries, public health and the long-term competitiveness of our nation will all benefit from the critical investments called for in the Water Infrastructure Financing Act.

Again, the Water Infrastructure Network strongly supports the bipartisan Water Infrastructure Financing Act and asks for your assistance in scheduling floor consideration of this critical jobs, infrastructure and environment legislation this fall.

Sincerely,
The Water Infrastructure Network
